SIXTH FORM DESIGN INSPIRATION

Thinking of revamping your sixth form? Or perhaps you have a new building that you're looking to turn into a sixth form space? In either case, this brochure is packed with ideas and inspiration.

Sixth form design projects are something of a speciality at TaskSpace. Sixth forms are the bridge between school and working life, so it's vital that your sixth form refurbishment results in contemporary, bright and welcoming space that is genuinely better than the local Starbucks!

TaskSpace has successfully carried out sixth form design and refurbishment projects for schools all across the UK.

If you'd like to discuss a potential project, even if you're just at the ideas stage, please contact us.

GETTING THE BALANCE RIGHT

With any sixth form space, it's crucial to strike the balance between break-out spaces for young adults to chat and catch up, and individual study areas for students to work and concentrate.

Our team of interior designers, project managers and site operatives will look after your sixth form project end to end – helping you create a space that bridges the gap between school and professional life for your students.
